

Chlorine and pH Meter

HANNA instruments® has developed HI 93710, a portable microprocessor-based instrument to measure pH, free chlorine and total chlorine, three critical parameters to ensure good water quality.

This instrument uses state-of-the-art technology to quickly and accurately determine the concentration of these parameters making it an excellent alternative to several chemical test kits.

- 3 meters in one: measures pH, free and total chlorine
- DPD (chlorine) and phenol red (pH) methods
- Lab grade accuracy and fast response
- Self diagnostic and error messages
- 300 tests with one battery
- Auto shut-off after 10 minutes

HI 93710C is a complete kit for all your measurement needs in the field
