

Portable Thermo-Hygrometers

HI 9065

Thermo-Hygrometer in a Water-Resistant Housing

HI 9065 is a professional thermo-hygrometer in a waterproof housing, particularly suitable for inclement or severe conditions. The rugged probe supplied with the meter incorporates a temperature sensor and measures both relative humidity and temperature. Four common AA-type batteries supplied with HI 9065 provide up to 500 hours of continuous operation. With a hold key, data can be frozen on the LCD. Temperature readouts can be displayed in both Celsius and Fahrenheit.

HI 9065: Rugged Thermo-Hygrometer for Everyday Use

Ordering Information

HI 9065 is supplied complete with RH/T probe HI 70608/2 with 2 m (6.6') cable, batteries, rugged carrying case and instructions. valigetta rigida ed istruzioni.

For detailed information about this product, see page N9.

HI 91610

Thermo-Hygrometer with Printing and Logging Capability

HI 91610 is a professional meter capable of memorizing up to 8000 accurate relative humidity and temperature measurements. The operator can set the logging or printing interval to match the application. Stored data can be printed right away, at a later date, or simply downloaded to a PC for further elaboration.

Temperature is measured with an additional temperature probe included in the package. Both the RH and temperature probe come with a 2 meter (6.6') lead.

HI 91610 runs for up to 500 hours on common AA type batteries. For users who need to the print function to work for longer periods of time, a 12 Vdc transformer is also included with the meter.

Choose from a Celsius (HI 91610C) or a Fahrenheit model (HI 91610F).

HI 91610 is the Ideal Solution to Monitor and Document Humidity Variations

Ordering Information

HI 91610 is supplied complete with RH/T probe HI 70604/2, HI 762L/2 temperature probe, 5 paper rolls, batteries, rugged carrying case and instructions.
